Scale Practice – Real Life Example (Option #2)

Assignment: If you feel you have mastered the concept of scale, then this assignment is for you! To practice scale in a challenging way, draw your bedroom below to scale. Be sure to include at least 5 features of your room + a scale so the viewer has some perspective when looking at the drawing.

If you are stuck or do not understand how to complete the assignment, then do the homework on the opposite side. It is ok if you are not sure, this is supposed to be a very challenging assignment!
